

MILB FIX

Bedding additive as mite protection.

MilbFix is finest milled zeolite for the use in poultry houses. The zeolite offers a high specific surface which is charged negative.

Due to the special milling of zeolite, sharp edges are formed. These leads to death of crawling insects and kills red mites. There is no risk of injury for poultry and the product itself has a physical effect.

MilbFix can store water and bind ammonium, what leads to a better climate in the stable.

Stored nitrogen compounds can be applied together with the litter as fertilizer on the field.

Benefits and effects:

- ✓ Purely physical effect against red mites
- ✓ Harmless and non-toxic
- ✓ High water storage capacity
- ✓ Binding ammonia

Hint:

Can also be used precautionary.

Packaging:

- ✓ 5 kg bucket
- ✓ 10 kg bucket
- ✓ 18 kg bag
- ✓ 810 kg Pallet (bags á 18 kg)

Anwendungsempfehlung:

- ✓ Use it daily. Dust perches and baths with MilbFix.
- ✓ Can also be used in a liquid way, therefore put 1 part MilbFix into 6 parts water and spray it onto perches and into mite hiding places.
